WAIT UNTIL IT'S SAFE TO GO...

THEN
3. CROSS!
WAVE — SAY THANKS!

ROAD-CROSSING GUIDE

WHAT TO EXPECT
FROM TRAILWAY
CROSSING SIGNALS

TWO KINDS OF CROSSING SIGNALS

WHAT HAPPENS WHEN ACTIVATED BY USERS?

RRFB stands for
Rectangular **R**apid **F**lashing **B**eacon

- Yellow flashing lights when activated; they flash for about 30 seconds to alert motorists that someone is about to cross the roadway.
- Cars **ARE NOT** required to stop; but some do; please use caution.
- Trail users should **look both ways** first then cross safely.

PASS
WITH
CARE

HAWK stands for
High Intensity **A**ctivated Cross**W**alk

- Upon activation, yellow lights flash first, then steady yellow, then steady red.
- Cars **MUST** stop on red, just like a regular traffic signal.
- Trail users should wait for the white **WALK** signal to illuminate before crossing.
- After about 10-15 seconds red lights will flash, along with a countdown for trail users. **If crosswalk is clear**, motorists may proceed through the intersection.
